

LUCENTE<sup>®</sup>

2011COLLECTION

**LUCENTE®**  
2011COLLECTION

LUCENTE parla di luce attraverso le sue collezioni che esprimono idee forti e che possiedono una personalità speciale. Le idee diventano materia anche attraverso la collaborazione con personalità diverse dal mondo del design, interpretando il pensiero di grandi professionisti e restituendo progetti che dimostrano tutta l'intuizione trasformata in semplicità.

LUCENTE è una combinazione di eleganza, di forme organiche e funzionalità, un progetto nato sulla convinzione che gli oggetti con un buon design possano migliorare la qualità della vita grazie alla loro estetica funzionale. La luce è capace di cambiare atmosfere e stati d'animo, Lucente cerca di interpretarne le sue molteplici applicazioni nella vita quotidiana.

LUCENTE talks about light through its collections which express strong ideas and have a special personality. Ideas become matter through collaboration with different personalities from the design world, interpreting the thought of great professionals and coming up with projects that demonstrate how intuition can be transformed into simplicity.

LUCENTE is a combination of elegance, organic shapes and functionality, a project springing from the conviction that well-designed objects can improve the quality of life thanks to their functional aesthetic appearance. The light is able to change atmospheres and moods, Lucente tries to interpret its many applications in everyday life.

**Sospensione a luce diffusa composta da 19 elementi in metallo che richiamano la forma elicoidale e che, dal centro della lampada dove si trova la sorgente luminosa, si irradiano verso l'esterno. La loro composizione appare geometrica e ordinata, da certi punti di vista, dinamica e casuale da altri. La fonte luminosa è al centro, contenuta all'interno di un vetro soffiato opale. Disponibile nei colori verniciato bianco lucido e rosso.**

Diffused light pendant made up of 19 metal coils spreading out from the globe with the lamp in the centre outward. The design is neat and geometrical at the same time looking vibrant and random. The lamp is inside the opal blown glass in the centre. Available finishes: glossy white and red painted.

Suspension à lumière diffuse composée de 19 formes hélicoïdales en métal. Un globe en verre est situé au centre, duquel partent ces formes géométrique à la fois dynamique et aléatoires. Le globe au centre est en verre soufflé opalin. Disponible en blanc ou rouge brillant.

Hängeleuchte mit diffusem Licht. Die Struktur besteht aus 19 Metallelementen, die eine Spirale bilden und von der Mitte der Leuchte aus, wo sich die Lichtquelle befindet, nach außen strahlen. Ihre Anordnung wirkt aus manchen Blickwinkeln geometrisch und geordnet, aus anderen dynamisch und zufällig. Die Lichtquelle befindet sich in geblasenem Opalglas. Oberfläche: Weiße oder rote Lackierung.

Lámpara suspendida a luz difusa con 19 elementos de metal de forma helicoidal que dal centro van estendendose hacia l'exterior. La composición de los elementos es geométrica y ordenada y nel mismo tiempo dinámica y casual. La bombilla está al centro dentro un vidrio soplado mate. Disponible en los colores blanco brillo y rojo.

Подвесной светильник состоит из 19-ти спиралевидных металлических элементов и центральной части, где расположен источник света. Спирали соединены в центре светильника и, расширяясь, расходятся наружу, создавая шарообразную форму. Спирали создают оригинальную композицию, которая с разных точек зрения кажется либо геометрически выверенной, либо хаотически разбросанной. Источник света заключен в шар из матового дутого стекла и располагается в середине светильника. Спирали могут быть окрашены в блестящий белый или красный цвет.

Lampada da terra realizzata in polietilene colore avorio tramite la tecnologia dello stampaggio rotazionale. La lampada è disponibile sia nella versione da interno che da esterno (IP44). Nella versione da interno sono disponibili degli accessori in lana lavorata a coste nei colori beige oppure rosso, da mettere come rivestimento al paralume. Nella versione da interno la base e il paralume possono avere un'accensione separata e dimerabile.

Ivory polyethylene floor lamp made with the rotational moulding technology. Available for indoor and outdoor (IP44) application. On the indoor version a wool cover for the diffuser is available in cream and red. On the indoor version the stem and the diffuser have separate dimmable switches.

Lampadaire en polyéthylène, coloris ivoire, réalisé grâce à une technique de moulage rotatif. Disponible pour intérieur ou extérieur (IP44). Pour le modèle d'intérieur, une étoffe de laine est disponible pour être rajouté à l'abat-jour, de couleur rouge ou crème. Pour la version d'intérieur, l'allumage peut être séparé est composé de deux variateurs, l'un pour le corps et le second pour l'abat-jour.

UP ist eine große Bodenleuchte für den Innen- und Außenbereich (Version IP44), die im Rotoformverfahren vollständig aus Polyäthylen gefertigt wurde. Die Basis und der Lampenschirm können gleichzeitig oder getrennt voneinander beleuchtet werden. Die Lampe ist in Elfenbeinweiß erhältlich. Bei der Version für den Innenbereich ist als Überzug des Lampenschirms ein beige oder rotes geripptes Wollteil mit einem Durchmesser von 60 Zentimetern erhältlich.

Lámpara de pie hecho en polietilene color marfil con la técnica del moldeo rotacional. La lámpara es disponible en la versión para interior o en la versión para exterior (IP44). En la versión para interior son disponibles accesorios en lana rojo o beige como decoración por la pantalla. Para la versión de interiores la base y la pantalla pueden iluminarse de forma independiente y regulable.

Корпус этого напольного светильника изготовлен из полиэтилена цвета слоновой кости методом ротационного формования. Светильник может быть как внутренним, так и уличным (IP44). Для внутренней модели предлагаются дополнительные вязанные из шерсти аксессуары бежевого или красного цвета. Их можно надевать на верхнюю, цилиндрическую часть светильника, имеющую диаметр 60 см. У внутренних светильников конусообразное тело и цилиндрический верх могут диммироваться и иметь раздельное включение.

## Direttiva RAEE: Rifiuti di Apparecchiature Elettriche ed Elettroniche

Il 25 Luglio 2005 il Consiglio dei Ministri ha recepito con Decreto Legislativo no 151 la Direttiva Europea 2002/95/CE e 2002/96/CE relativa alla riduzione delle sostanze pericolose nelle apparecchiature elettriche ed elettroniche e dello smaltimento dei rifiuti da essi derivanti. L'obiettivo è promuovere una logica di sviluppo sostenibile nel settore delle apparecchiature elettriche ed elettroniche, di cui gli apparecchi di illuminazione ne fanno parte, ai fini di un corretto trattamento dei prodotti a fine vita e ciò può attuarsi attraverso la piena conformità alla Direttiva RAEE. Il Produttore, come definito dal Dlgs no 151, dovrà farsi carico dei costi di gestione che comprendono la raccolta, presso gli impianti di stoccaggio provvisorio e dello smaltimento dei rifiuti degli apparecchi di illuminazione immessi sul mercato dopo l'Agosto 2006. Per adempiere a questi obblighi di legge LUCENTE S.r.l. ha deciso di avvalersi del supporto del Consorzio ECOLIGHT, Via Gattamelata 34, 20149 Milano Tel 02 33600732.

Gli apparecchi di illuminazione saranno marcati in modo da identificare il Produttore e riportare il simbolo del cassonetto barrato, indicante la raccolta differenziata separata dal resto dei rifiuti urbani, inoltre saranno soggetti al contributo di smaltimento, differenziato per fascia di peso. Gli utenti finali potranno consegnare i suddetti apparecchi senza costi aggiuntivi presso i punti di raccolta appositamente realizzati e comunicati dal Consorzio. I distributori sono obbligati ad assicurare al momento della fornitura di una nuova apparecchiatura, il ritiro gratuito, in ragione di uno ad uno, della apparecchiatura usata. L'obbligo di informazione relativo al contributo dovrà essere mantenuto visibile in fattura, da parte del Produttore, fino al 13 febbraio 2011.

I prodotti elencati con il relativo peso netto alla fine del presente catalogo saranno soggetti al contributo di smaltimento a seconda della fascia di peso di appartenenza:

- fascia 1: apparecchi il cui peso è compreso tra 0 e 2 Kg
- fascia 2: apparecchi il cui peso è compreso tra 2 e 8 Kg
- fascia 3: apparecchi il cui peso è superiore a 8 Kg

### Direttiva RoHS

Il Decreto Legislativo sopra menzionato incorpora anche la Direttiva 2002/95/CE - RoHS - Limiti d'uso di alcune sostanze pericolose - relativa alla riduzione delle sostanze pericolose nelle apparecchiature elettriche ed elettroniche.

A partire dal 1° Luglio 2006 tutte le nuove apparecchiature elettriche ed elettroniche immesse sul mercato non dovranno contenere o contenere in misura limitata sostanze quali: Piombo, Mercurio, Cadmio, Cromo esavalente, Bifenile polibromurati (PBB), Eteri difenilbromurati (PBDE).

## WEEE Directive: Waste Electrical and Electronic Equipment

On the 25th July 2005, the Council of Ministers incorporated the European Directive 2002/95/CE and 2002/96/CE – related to the reduction of hazardous substances in electronic and electrical equipment and their waste disposal - into Italian legislation with the Legislative Decree number 151. The objective is that of promoting a notion of sustainable development within the electronic and electrical equipment sector, to which lighting equipment belongs, with the aim of correctly treating the products once they have reached the end of their lives; this may be accomplished by fully complying with the WEEE Directive. The Manufacturer, as defined by the Legislative Decree number 151, will be responsible for the management costs which include collection from temporary storage facilities and the costs for waste disposal of the lighting Equipment. In order to fulfil these legal obligations LUCENTE S.r.l. have decided to call upon the support of the ECOLIGHT Consortium; Consorzio ECOLIGHT, Via Gattamelata 34, 20149 Milan Tel. +39 02 3360 0732.

The lighting equipment will be marked in such a way as to identify the Manufacturer and show the symbol of the crossed wheeled bin, which indicates a separate collection from the rest of the urban waste, the equipment will also be subject to a disposal contribution and will be distinguishable by its weight range. The contribution will be determined prior to the law coming into force and will be made official by the ECOLIGHT Consortium. The end users will be able to deliver the above-mentioned equipment without any add-on costs to the authorised collection sites as notified by the Consortium. Distributors are obliged to ensure a free take-back service of the used equipment, at the time of the supply of a new unit, on a one-to-one basis. The Manufacturer has a duty to supply and maintain information related to the amount of contribution and this must be shown on invoices until 13th February 2011.

The products listed in this catalogue will be marked with range symbols. Each symbol should be shown against its relevant range within the following table and each range will be subject to a different disposal contribution:

- range 1: the equipment weight which is between 0 and 2 kg
- range 2: the equipment weight which is between 2 up to 8kg
- range 3: the equipment weight which is over 8kg

### The RoHS Directive

The above-mentioned Legislative Decree has also implemented the RoHS 2002/95/CE Directive. The Restriction of the use of certain Hazardous Substances (RoHS) in electrical and electronic equipment.

As from 1st July 2006, all new electrical and electronic equipment put on the market must not contain, or contain limited quantities of, certain substance, namely: Lead, Mercury, Cadmium, Hexavalent chromium, Polybromide biphenyls (PBBs), Polybromide diphenyl ethers (PBDEs).
